RE: Heath Engineering Reference

May 6, 2025

To Whom It May Concern,

I am writing to recommend Heath Engineering as an exceptional structural engineer and consulting Professional. I have had the pleasure of working with Daniel for the past year, during which he has consistently demonstrated the qualities essential for successful coordination with consultants, municipalities and construction teams.

Daniel has a strong foundation in structural design and analysis, with hands-on experience in projects ranging in all scopes e.g., commercial buildings and multi-story multi use commercial industrial and residential facilities. What truly sets him apart is his ability to bridge the gap between design and execution. Daniel and his team understand the practical challenges faced on-site and collaborates seamlessly with project managers, site supervisors, and subcontractors to ensure designs are buildable, efficient, and compliant with code.

His communication is clear and solution-oriented, which is vital in a fast-paced construction environment. Whether resolving conflicts in structural details or making realtime adjustments during construction, Daniel has always been responsive, knowledgeable, and easy to work with.

I believe Heath Engineering would be an asset to anyone looking for a dependable and collaborative structural engineer who understands the realities of construction while maintaining high engineering standards. Please don't hesitate to reach out to me if you'd like to discuss his qualifications further.

Sincerely,

Lisa Guilbeault
Project Manager
