RE: Letter of Recommendation, Daniel Heath

BCW have collaborated with Heath Engineering for several years on many interesting projects throughout Calgary. We have found Daniel's firm to be diligent, responsible, and a real team player in coming up with innovative solutions when challenged with design issues and showing great willingness to work with our team when called upon. His attention to details and on time deliverables gives us great confidence in continuing to work with their firm on a variety of our commercial/industrial projects.

Other than providing a well-coordinated detailed set of Contract Drawings on schedule, Daniel's on-site construction administration is impressive and consistent, with thorough site reviews and reports, as well as proactive responses to the contractor's RFIs and Shop Drawing reviews.

We would highly recommend Daniel to any team who is seeking a competent structural engineer for their up-and-coming projects. We look forward to continuing our working relationship with Heath Engineering to service our clients.

Sincerely,

Peter Wong, MRAIC, MAAA
Principal of BCW Architects
